## Work Experience

---

### General Motors

*Detroit, Michigan*

INCOMING SOFTWARE ENGINEER INTERN

June 2022

- Will build and support GM's systems, applications, and platforms as well as configuring, optimizing, and deploying packaged software.

### Symetra

*Bellevue, Washington*

SOFTWARE ENGINEER INTERN

June 2021 - September 2021

- Worked with a team to create an organization map from the company's database using React.
- Customized the sign-in webpage of Symetra by implementing Amazon Cognito UI with AWS CLI.
- Adhered to the Scrum development process by performing standups, sprints, and retrospectives.

## Projects

---

### COVID Resources Map

- Collaborated with 4 other team members from 3 different countries at Dubhacks to build a website in HTML5, CSS3, Javascript.
- Integrated the Google Maps API to create interactive maps that show the free COVID testing sites and the locations that hand out free masks.

### EZ Trivia Game

- Created a Trivia game graphical interface using HTML5, CSS3 and Javascript.
- Built the backend of the game in PHP and used MySQL to store and update players' scores.
- Fetched questions and answers data from Jservice.io.
- More than 100 of my classmates have played the EZ Trivia Game.

### Road Rage

- Implemented interface and abstract class in Java to create behaviors for 6 vehicle models when they were on the street and interacted with each other.
- Wrote JUnit test to test behaviors of a vehicle model.

## Extracurricular

---

### HuSCII Coding Club

*University of Washington*

CHIEF OPERATING OFFICER

- Assisted in running and planning club weekly meetings and events.
- Communicated with club members to facilitate enthusiasm and understanding in club meetings and events.
